Professional Summary

Third-year Computer Science student at the Arab American University with an expected graduation in 2027 and a GPA of 3.0. Passionate about Software Development, Mobile Application Development, and Web Development. Skilled in Java, Kotlin, C++, HTML, CSS, JavaScript, SQL, and Android Studio through academic coursework and hands-on projects. Eager to gain practical experience through an internship, enhance my technical skills, and contribute to real-world software development projects.

Education

Arab American University

Bachelor of Science in Computer Science

- Current Year: Third Year
- Expected Graduation: 2027
- GPA: 3.0

Technical & Programming Skills

Java

- Strong understanding of Object-Oriented Programming (OOP).
- Experience with Classes, Objects, Inheritance, Encapsulation, Abstraction, and Polymorphism.
- Developed academic applications using Java.

Kotlin & Android Studio

- Developed Android applications using Kotlin.
- Designed user interfaces using XML.
- Worked with Activities, Intents, and SQLite databases.
- Built interactive and user-friendly mobile applications.

C++

- Strong foundation in programming fundamentals and algorithms.
- Applied Object-Oriented Programming principles.
- Enhanced programming and logical thinking skills.

HTML & CSS

- Built responsive and well-structured web pages.
- Designed user interfaces using HTML and CSS.
- Created forms, tables, and responsive layouts.

SQL & Databases

- Designed relational databases.
- Created tables and relationships using Primary and Foreign Keys.
- Wrote SQL queries for data management.
- Designed Entity Relationship Diagrams (ERDs).

Data Structures

- Good understanding of data structures and algorithms.

- Worked with Arrays, Linked Lists, Stacks, Queues, and Trees.
- Applied searching and sorting algorithms.
- Basic understanding of Time and Space Complexity.

Soft Skills

- Teamwork
- Fast Learning
- Time Management
- Effective Communication
- Analytical Thinking
- Self-Learning
- Responsibility
- Attention to Detail

Projects

✓ Serve Me – Android Application

Technologies: Kotlin, XML, SQLite, Android Studio

- Developed an Android application that connects users with service providers.
- Designed user-friendly interfaces using XML.
- Implemented SQLite for managing user and booking data.
- Applied Object-Oriented Programming concepts throughout the project.

✓ University Database Management System

Technologies: SQL, MySQL

- Designed and implemented a relational database for university management.
- Created database tables, relationships, and SQL queries.
- Designed an Entity Relationship Diagram (ERD).

✓ **Web Calculator**

Technologies: HTML, CSS, JavaScript

- Developed a responsive web calculator for basic arithmetic operations.
- Designed a clean and user-friendly interface.
- Implemented application logic using JavaScript.

✓ **Personal Portfolio Website**

Technologies: HTML, CSS, JavaScript

- Designed and developed a responsive personal portfolio website.
- Showcased personal information, technical skills, and academic projects.
- Built a responsive layout compatible with different devices.

✓ **Career Path Advisor – Rule-Based System**

Technologies: Java

- Developed a rule-based system to help users choose suitable career paths based on their interests, skills, and preferences.
- Designed logical rules to analyze user input and generate appropriate recommendations.
- Applied decision-making concepts and Object-Oriented Programming principles to implement the system.

Tools & Technologies

- Android Studio
- Visual Studio Code
- IntelliJ IDEA
- GitHub
- MySQL

Relevant Coursework

- Object-Oriented Programming
- Mobile Application Development
- Web Development
- Database Systems
- Data Structures
- Software Engineering

Certificates

- Ramadan CS Fundamentals Boot camp – Knowledge Academy (2026)
- Ramadan Front-End Design Boot camp – Knowledge Academy (2026)

Languages

- Arabic: Native
- English: Very Good (Reading, Writing, and Speaking)

Career Objective

Seeking an internship opportunity in Software Development, Mobile Application Development, or Web Development where I can apply my academic knowledge, gain practical experience, strengthen my technical skills, and contribute to real-world software projects while continuously developing my professional career.
